DESCRIPTION

Penthouse by the sea

In Albenga, in the prestigious complex of new construction 50 meters from the sea we propose three-room penthouse apartment with solarium. The new construction of high quality and design was designed by Architect Goncalo Birne and the construction company has equipped it with high-tech features making it unique precisely because of its features such as, for example, the large windows that allow natural light inside and create a single environment with the balcony of the living room. The apartment located on the fifth floor has an entrance into a large living room with kitchenette, the full-wall

and full-height sliding glass window allows access to the livable terrace (of about 9 square meters), double guest bedroom, service bathroom, master double bedroom with private bathroom. From the living room a comfortable and elegant helicoidal staircase leads upstairs to a room furnished with a second kitchen and a sliding glass window opens access to the large solarium where it is possible to place a swimming pool. The entire apartment and the solarium are elegantly furnished with quality furniture. The property is completed by a single car garage of about 19 sqm and a cellar of 4 sqm.
