DESCRIPTION

Cilento: central apartment with terrace and sea view

In the beautiful setting of Palazzo Talamo, in the Historic Center, close to the waterfront and the marina, we offer an apartment with large spaces and terrace overlooking the sea. The palace, one of the most prestigious in the Center, is owned by the Talamo family, suacostruzione dates back to 1786 (later restored in 1844). We access the property through a driveway and the portion of the terrace, or from the main entrance of the Palace where crossed the threshold we are greeted by a large living room from which we access the other rooms. From the windows facing the Tourist Port we enjoy the view of the sea and the city. The apartment,

of ample size, has the characteristics of the houses of the past, such as high ceilings and large rooms that give breath and light to this beautiful property overlooking the blue sea of Cilento, multi-awarded with the Blue Flag of Legambiente as well as the Tourist Port for the landing services. The apartment lends itself to be split into two comfortable independent units (having already two entrances) or to be used as a prestigious second home by the sea. Given the strategic, central and seaside location it can be an excellent investment for receptive use as a B&B. A portion of a terrace on the floor completes this unique property.
